Course for Ph.D. students
XLI Cycle (1 Nov 2025 – 31 Oct 2028)

Curriculum
INNOVAZIONE NEL CAMPO DELLE SCIENZE FARMACEUTICHE

Title: From Bench to the Clinic
(1 ECTS)

Prof. Daniele Piomelli
UNIVERSITY OF CALIFORNIA – IRVINE (USA)

Course language: **English**

Approximative scheduling: April – May 2026
The exact date and time will be announced by e-mail and on the website in the page "Active courses" for each session.

To attend the course please contact:
alessio.lodola@unipr.it

Course description
The course aims to provide an overview of the drug discovery process, starting from the identification of a molecular target to the identification and development of a new chemical entity (NCE). Based also on his own personal experience, the teacher will show real cases of discovery and development of NCEs that have progressed up to the clinical phases. Scientific articles selected *ad hoc* will be distributed to students and then discussed in class to illustrate specific aspects of the course.

Evaluation: NO
