

Depositing the thesis in DspaceUnipr

In addition to the mandatory deposit of the thesis on ESSE3, as of **A.Y. 2022/23 (May session)** for undergraduates of the degree programs in Pharmacy, Chemistry and Pharmaceutical Technology and Food Science and Technology, it is **OPTIONAL** to deposit their thesis in digital format also in the institutional repository DspaceUnipr, which aims to give visibility to the University's scientific and educational production. For more information on this opportunity, visit the [DSpace page](#).

The choice to avail oneself of this opportunity goes through a preliminary discussion with the **supervisor**, who must evaluate the initiative favorably or may promote it himself.

If a favorable decision is made, the deposit in DSpace is made with the same deadlines as for the deposit in **Esse3** (see below).

After discussion in the graduation session, the thesis will be placed in the digital repository and made open access searchable. When uploading the document, it is possible to request the application of certain access restrictions (embargo period) if there are constraints on the disclosure of the results: you should evaluate this possibility with your thesis supervisor.

Any requests for changes after graduation must also be agreed upon with the supervisor and addressed via email to the DSpace repository contact **Dr. Maria Grazia Suriano** (bibfarm@unipr.it)

Timeline for uploading the thesis to DSpace

- Sufficiently in advance of the following deadlines, the undergraduate student should meet with the thesis supervisor to mutually consider whether the thesis should be deposited on DSpace. In this regard, see the [form](#) to be signed for digital deposit of the thesis and the [instructions](#) for uploading the thesis into DSpace by the student and for its [validation](#) by the supervisor.
- **Within 30 days** from the date of graduation, **fill** the digital thesis deposit [form](#) and send it, also signed by the supervisor, to bibfarm@unipr.it.
- **Within 7 days** from the date of graduation, **deposit in DSpaceUnipr the thesis file** (PDF/A) following the instructions. Even in DSpaceUnipr the thesis will be reviewed and must be approved by the thesis advisor.
