R&D Barilla Food Research Microbiology

Paola Carnevali Ph.D. enjoys an excellent reputation, well recognized by International Scientific Communities. For over 30 years she has been leading Food Research and Innovation projects, in Agri-Food sector and Plant Science. Thanks to these collaborative research studies and projects (EU, ICE-CRUI Funded, ILSI-Europe...) she acquired a high level of interdisciplinary Know-How.

Main *functional skills*: Genetic, Molecular Biology, Microbiology, Food Safety, Nutrition, Human Gut Microbiota/Microbiome, Plants/Soil Microbiota/Microbiome, Functional foods as: pre-/pro-/symbiotic, Natural Fermentations, Innovative Technologies, Food Chemistry and Technologies.

Main *behavioral skills:* she demonstrated high ability to work and to lead Working Groups adopting multi-disciplinary/functional approaches, that favored her integration in large international networking actions and permitted her to carry out outsourced research projects for generating Innovation in line with Company research strategies.

Finally, she demonstrated a broad ability to build and manage scientific alliances based on mutual benefits by encouraging collaborations between Public and Private sectors.

One passion Research!
