D		Elective Activities ²	12
F		Visits to organisations and companies/Seminars or (only for foreign students) "Italian Language for Foreigners" ³	3
E		Final Dissertation	21
		Total Credits	66

NOTES

¹ To fulfill TAF C requirements, students must choose two courses (for a total of 12 ECTS) within one of the two groups: *Innovation in the Agri-Food Sector* and *Sustainability and Food Systems*.

² As for the elective activities/options, students can attain a total of 12 ECTS by combining one or more of the following options:

- a) Courses offered within the TAF C modules (in addition to those previously selected); courses delivered in English by the other Degree Programs in the Department or the University; cross-curricular courses in English, as specified year by year by the University and the Course Council; curricular internship activities for 6 ECTS; exams completed abroad through the Erasmus programme;
- b) Professional Skills course (6 ECTS);
- c) In lieu of a single elective course (TAF D) students may include in their study plan the activities listed below. The earned ECTS must be at least 6, and can be attributed to more than one of the listed activities. Any additional ECTS, beyond the 6 acquired through the listed activities, will still be certified in the student's academic record.
 - "Free participation activities" (sports, cultural, artistic or social activities certified according to the provisions established by the "Regulation for Free Participation Activities" <https://www.unipr.it/crediti-attivita-di-libera-partecipazione>");
 - Universal Civil Service: students who have completed national civil service, and expressly require it to be recognized, can be granted 6 ECTS as an elective activity in lieu of free participation activity recognition established in the point above. In order to receive credits for Universal Civil Service, the interested student should submit a specific request, filling out the appropriate form and attaching the relevant certification. The Course Council will automatically recognize the activity without reviewing the service undertaken by the

student. If the student is unwilling or unable to request recognition of the abovementioned activities, the student can request the recognition of 6 ECTS for training internship. In this case, however, the activities undertaken must be consistent with the student's study plan and the educational programme of the degree course. The activity will be evaluated through the same procedure used – on the didactic level – to determine the equivalence between external activities independently carried out by the student and training internships.

N.B: for courses worth more than 6 ECTS, the credits obtained by passing the exam will still be counted in the student's academic record as additional credits beyond those required to obtain the degree.

³ The Italian language proficiency exam is only required for foreign students. Students must however participate in organisations and companies visits and/or seminars. In this case, the 3 ECTS obtained will still be counted in the student's academic record as additional credits beyond the 120 ECTS required to obtain the degree.
